SUMMARY

Full Stack Developer specializing in secure financial technology and third-party integrations. Extensive experience developing KYC portals, online biller platforms, and multi-currency management systems. Highly proficient in PHP (Laravel) and modern frontend frameworks (React 18, Vue.js), with a deep focus on E2E encryption, RBAC, and regulatory compliance. Adept at transforming complex business requirements into high-availability services that process high-volume transactions and sensitive subscriber data.

SKILLS

- **Backend:** PHP, RESTful APIs, Service/Repository Patterns, API Gateway Design, Microservices Architecture.
- **Frontend:** React.js, Node.js, Vue.js, Inertia.js, TypeScript, Tailwind CSS, Shadcn UI.
- **Data & Storage:** PostgreSQL, Oracle, MongoDB, Redis, AWS S3.
- **Tools:** Docker, Jenkins, Git, Sentry, Pest PHP, PHPUnit.

EDUCATION

Computer Science

University Of Computer Studies, Hinthada

12/2015 – 2020 | Hinthada

CERTIFICATES

- Professional Web Developer Course
- Taxila Institute of Foundation Leadership and Capacity Development

PROFESSIONAL EXPERIENCE

Full Stack Developer

Wave Money

01/2024 – Present | Hlaingtharya, Yangon

- Developed and maintained modular monolithic and microservices-based financial systems using Laravel, supporting 100K+ daily transactions for Myanmar's leading mobile financial services provider.
- Designed and implemented a secure API Gateway using HMAC-SHA256 encryption, standardizing integrations for 15+ third-party partners (including Grab and FoodPanda) and reducing partner onboarding time by ~30%.
- Built a multi-currency processing engine (MMK, USD, THB, SGD) with asynchronous workflows, enabling real-time currency conversion and improving settlement accuracy across international transactions.
- Developed a KYC Portal with biometric document verification and RBAC, helping the compliance team process 40% more verifications per day while meeting regulatory standards.
- Implemented a Redis-backed fraud detection mechanism to flag high-risk transactions in real time, contributing to a measurable reduction in suspicious activity incidents.
- Created admin dashboards and operational webviews using React 18, TypeScript, Inertia.js, and Tailwind, improving internal operations efficiency and reducing manual reporting tasks.
- Introduced CI/CD pipelines using Jenkins and Docker, decreasing deployment failures by ~25% and reducing release cycles from days to hours.
- Enforced automated testing and coding standards using Pest PHP, PHPUnit, Laravel Pint, and Husky, increasing code coverage and reducing post-release defects.
- Partnered with product managers and cross-functional teams to translate complex financial requirements into scalable, high-availability services.

Web Developer (Intern to Senior)

METATEAM MYANMAR Co., Ltd.

09/2023 – 12/2023 | Botataung, Yangon

- Developed and maintained scalable web applications using PHP (Laravel, Phalcon), Vue.js, and MySQL, supporting multiple internal and client-facing systems.
- Designed and implemented MVC-based architectures, improving code maintainability and reducing feature development time by ~20%.
- Built responsive and cross-browser-compatible UIs using HTML, CSS, JavaScript, Vue.js, and TypeScript, improving overall user experience and usability.
- Collaborated with developers and QA teams through GitHub, GitLab, and Bitbucket, helping reduce merge conflicts and enabling smoother release cycles.

PASSIONS

Software Development Innovation

Deeply interested in creating cutting-edge technological solutions to enhance user experiences.

Cycling

Enjoy long-distance cycling, embracing both physical and mental challenges.

- Containerized applications using Docker and assisted with deployments on Nginx-based environments, improving environment consistency between development and production.
- Conducted API, functional, integration, and performance testing using Postman, identifying critical issues early and improving system stability.
- Troubleshoot and resolved server- and application-level issues, contributing to higher system uptime and deployment reliability.
- Mentored junior developers as a Senior Developer, promoting clean coding practices and raising overall team productivity.
